The new industry standard

The access to your septic tank, pump vault or holding tank should be easy, accessible and safe. Our new cast iron covers offer a lifetime of protection. These covers need no receiver or frame; they fit on the new STF-R824 series riser that is setting a standard by itself. SIM/TECH is also offering a durable, light-weight structural foam cover that is practical for many systems. Safety is also an important issue and SIM/TECH has addressed that with a 3-rod latching system for our covers and a low-cost security net for the new STF-R824 riser.

STF-CI24 Cast Iron Series

- Strongest in the industry (12,000 lbs. wheel load)
- Weights in at over 60 lbs. - not easily removed by children even when not secured by screws
- Unaffected by UV rays or any weather conditions
- Will not crumble due to freeze/thaw cycles
- Overlapping design keeps debris away from access hole unlike recessed covers
- Positive drop-in feature that assures proper cover and gasket placement when installed
- Can be retrofitted on many existing risers (ask about special gaskets)
- Non-skid diamond plate surface is second to none
- Unmatched in appearance and is paintable
- Allows riser to be brought to surface without cover extending above yard unlike concrete risers and covers

STF-SF24B & STF-SF24G Structural Foam Series *by Jackel, Inc.*

- Durable (can handle up to 2,500 lbs.)
- Light-weight
- UV inhibitors for longer protection
- Will not crumble
- Overlapping design
- Positive drop-in feature
- Can be retrofitted to many risers
- Skid resistant
- Great appearance, available in black or green
- Allows riser to be brought to surface
- Not for vehicular traffic*

*Cover shown here
with STF-R824 segmented riser
and STF-AR24 tank adapter ring.*

STF-BL24 & STF-GL24 Structural Foam w/ 3-Rod Latching System

All of the above structural foam series features plus a 3-rod latching system that requires wrench for access.

It is highly recommend that you use SIM/TECH's STF-N24 security net on all systems to prevent accidental entry while systems are being serviced. The net installs easily in the STF-R824 series riser.
